LEAKING UNDERGROUND STORAGE TANKS HAVE BECOME ONE OF THE LARGEST CONCERNS IN THE BUSINESS SECTOR TODAY! THOSE OLD TANKS CANNOT BE IGNORED. CONGRESS HAS EMPOWERED THE ENVIRONMENTAL PROTECTION AGENCY TO INSURE THAT ALL UNDERGROUND STORAGE TANKS (UST'S) ARE PROPERLY INSTALLED, MAINTAINED, MANAGED, UPGRADED OR REMOVED AS SCHEDULED.

As a UST owner or operator in Illinois, you are obligated to maintain compliance with all the guidelines and regulations set forth by the Illinois Environmental Protection Agency and the Office of the State Fire Marshall. Knowledge and compliance of these regulations is in your best interest as clean-up of UST leaks and fines for non-compliance with the regulations can be extremely costly. Like most tank owners or operators, you are probably not aware of how to fully assess your UST operations. This is where we can help.

Adept Environmental Solutions is aware of the current requirements for UST's. Adept has the ability and the expertise to handle all your UST needs and at competitive rates. Specializing in tank removals and soil borings, Adept Environmental Solutions can also perform environmental property assessments, storage tank assessments, project management, corrective action planning, equipment up-grades and soil remediation/removal.

Enclosed is one of our flyers for your files. (Note the important UST information located on the back of the flyer.) Contact us if you have any questions or desire more information regarding your liabilities as a UST owner/operator. We would be happy to discuss your situation and we guarantee complete confidentiality.

The Environmental Protection Agency has recently imposed certain requirements regarding the installation, operation, maintenance and closure of underground storage tanks (UST's). The new laws are quite specific and comprehensive as to the management and liabilities of all UST's. Adept Environmental Solutions is aware of these requirements and is prepared to service your UST needs.

Adept Environmental Solutions offers the services you need to assess your property for loan or transfer purposes and Adept can remove your tanks, remediate any contaminated soils and obtain clean closure of your site. If you decide to maintain your UST's, Adept can up-grade your tank and piping to meet current and future environmental requirements.

Clean closure of a site is not always limited to tank removal. Adept can provide the design of corrective action plans, permitting, soil testing, groundwater monitoring, soil remediation/removal and assistance in applying for financial reimbursement if applicable.

Adept Environmental Solutions will provide total professional services from beginning to end of your project. Our experience in documenting all procedures insures complete and proper closure of the site.

Call us today to discuss your UST concerns or questions. Not knowing or understanding your UST obligations could be costly.
